For the attention of Mr Miles Cole,

CUSTOM HOUSE, KING GEORGE V LOCK WATER SAMPLING, LABORATORY ANALYSIS AND BATHING WATER QUALITY ASSESSMENT

1 Introduction

In accordance with the Bathing Water Quality Sampling and Testing programme, we present our site observations/measurements and laboratory analysis results for 20 July 2020.

2 Fieldwork

Although field measurements are no longer required when reporting bathing water, SOCOTEC deem it prudent to continue this monitoring as it will indicate any abnormal characteristics associated with the water. On this occasion the additional field monitoring was not undertaken due to an equipment malfunction. Therefore monitoring will continue at the next site visit in accordance with the requirements of the EC Directive concerning the quality of bathing water (76/160/EEC) and The Bathing Waters (Classification) Regulations (SI 1991 No.1597 & SI 2003 No.1238)

Samples were collected for laboratory analysis, from six pre-selected locations within the Royal Docks area: -

- RV1, RV2, RA3, RA5, KG7 & KG8.

Sampling was performed from a boat provided by RODMA, with samples retrieved from the centre of the water space within the docks and from approximately 0.3 m below surface level.

3 Results

Laboratory analysis results sheets are appended at Appendix A.

4 Discussion

The results of laboratory analysis for *Enterococci* and *E. Coli* have been compared to the mandatory values set out in Directive 2006/7/EC of the European Parliament and of the Council concerning the management of bathing water quality and United Kingdom Statutory instrument 2013 No 1675.

Comments have also been made comparing the field observations and measurements and Total Coliforms to former regulations “The Bathing Waters (Classification) Regulations 2013” (Statutory Instrument SI 1991 No. 1597, and SI 2003 No. 1238) and “European Community Council Directive of 8th December 1975 concerning the quality of bathing water” (76/160/EEC).

We have assumed that maintenance of the dock areas includes the routine removal of litter, leaves and other floating debris.

On this occasion, all locations represented by samples from RV1, RV2, RA3, RA5, KG7 and KG8 meet the thresholds for ‘Excellent Quality’ as they complied with Directive 2006/7/EC and Bathing water Regulations 2013.

5 Recommendations

All locations sampled and tested **COMPLIED** with the guidance for water contact sports and bathing water quality deeming water **SUITABLE** for water contact sports or for bathing.

The next routine sampling and monitoring visit is scheduled for the week commencing 3rd August 2020.

We trust that we have interpreted your requirements correctly and will be pleased to discuss the matter further as necessary.

Yours Sincerely

A handwritten signature in black ink, appearing to read 'Mark Hurcomb'.

This Report has been prepared by SOCOTEC UK Limited with all reasonable skill and care, within the terms and conditions of the contract between SOCOTEC UK Limited and the Client (“Contract”) and within the limitations of the resources devoted to it by agreement with the Client. Any reliance upon the Report is subject to the Contract terms and conditions.

This Report is confidential between the Client and SOCOTEC UK Limited. SOCOTEC UK Limited accepts no responsibility whatsoever to third parties to whom this document, or any part thereof, is made known. Any such party relies upon the Report at their own risk. The Contracts (Rights of Third Parties) Act 1999 does not apply to this Report nor the Contract and the provisions of the said Act are hereby excluded.

This Report shall not be used for engineering or contractual purposes unless signed above by the author, checker and the approver for and on behalf of SOCOTEC UK Limited and unless the Report status is ‘Final’.

Unless specifically assigned or transferred within the terms and conditions of the Contract, SOCOTEC UK Limited asserts and retains all Copyright and other Intellectual Property Rights in and over the Report and its contents. The Report may not be copied or reproduced, in whole or in part, without the written authorisation from SOCOTEC UK Limited. SOCOTEC UK Limited shall not be liable for any use of the Report for any purpose other than that for which it was originally prepared.

Whilst every effort has been made to ensure the accuracy of the data supplied and any analysis interpretation derived from it, the possibility exists of variations in the ground and groundwater conditions around and between the exploratory positions. No liability can be accepted for any such variations in these conditions. Furthermore, any recommendations are specific to the development as detailed in this Report and no liability will be accepted should they be used for the design of alternative schemes without prior consultant with SOCOTEC UK Limited.

APPENDIX A
ANALYTICAL LABORATORY RESULTS

**ROYAL DOCKS MANAGEMENT AUTHORITY LTD
BATHING WATER QUALITY SURVEY**

LOCATION: RV 1 (Royal Victoria Dock, West)

Date: 20 July 2020

Weather: Sun

Time: 11:30

On site Observations	Units	Result	SI 1991, No.1597 or Mandatory Value 76/160/EEC	Former Guideline Value 76/160/EEC	
Water Colour	~	Clear/ brown	No abnormal change	~	
Oil Film	mg/l	None	No visible film	0.3	
Lasting Foam/surfactants	mg/l	None	No lasting foam	0.3	
Phenolic Odour/Phenols	mg/l	None	No specific odour	<0.005	
Floatables	~	None	~	absence	
On site Measurements					
pH	~	9.08	6 to 9	~	
Electrical Conductivity (ACT)	µS/cm, 25°C	7645	~	~	
Electrical Conductivity (SP)	µS/cm, 25°C	8361	~	~	
Water Temperature	°C	19.86	~	~	
Ambient Temperature	°C	20	~	~	
Transparency (Secchi Depth)	m	1.0	1*	2	
Dissolved Oxygen	mg/l	14.24	~	~	
Dissolved Oxygen Saturation	%	158.36	~	80 to 120	
Laboratory Analysis					
Total Coliforms	cfu per 100 ml ¹	55	10,000	500	
Directive 2006/7/EC and Bathing water Regulations 2013					
Water Quality Assessment – RV1 – LJ8664			Excellent	Good	Sufficient
<i>E.Coli</i>	cfu per 100 ml ¹	0	<250	250-500	500
Intestinal <i>Enterococci</i>	cfu per 100 ml ¹	1	<100	100-200	185

¹ Colony forming units (cfu) per 100 ml

Summary

On this occasion, with the exception of elevated dissolved oxygen, all onsite parameters and Total Coliforms complied with the Former Guideline Value 76/160/EE (500 cfu per 100 ml) and the SI 1991, No.1597 or Mandatory Value 76/160/EEC. Under the Directive 2006/7/EC and Bathing water Regulations 2013, Intestinal *Enterococci* and *E.Coli* was within the threshold for 'Excellent' deeming the water to be 'Excellent Quality'.

Conclusion

The water in this location complied with guidance and is SUITABLE for water contact sports and as bathing water.

Notes

We have assumed that maintenance of the dock areas includes the routine removal of litter, leaves and other floating debris. Items marked with an asterisk allow for exceedance of the limits on the basis of exceptional geographical or meteorological conditions.
